Industrial & Commercial

www.tjhall.co.uk

Relocating or extending your existing building can prove costly in both time and money. TJ Hall has over 30 years experience successfully delivering 'the perfect working environment'. We are one of a small number of contractors who specialise in providing industrial solutions as well as mainstream construction and office fit-out.

We can supply and install anything from a simple 50p container to a full multi-million pound 'turn key' installation to suit your needs.

TJ Hall can build from the foundations up and fit-out from the roof down.

Our [Industrial & Commercial Catalogue](#) provides a single order point for all your material handling and storage needs. We can supply and fit anything from a simple storage bin to mobile & static pallet racking bays. If your requirements are bespoke our experienced design team are here to help.

We can advise on a wide range of systems which will help improve and increase your storage efficiency. After discussing your requirements our designers will complete site surveys, design, project manage and install your new system with the minimum of disruption to your clients and employees.
