DHL, East Midlands Airport

Replacement of Gas Fired Water Heaters

Contract Value: £50k

As part of DHL International's Go Green Policy, TJ Hall Electrical & Mechanical Services were commissioned to replace two aging and not fully functional gas-fired hot water heaters serving the reception, changing facilities and office areas. DHL are moving over to more sustainable and carbon neutral ways of heating, cooling, and hot water provision at their sites in the form of electric power.

Turnkey Works Included

- Electrical Isolations
- Gas Isolations
- Water Isolations
- Capping off and testing of services
- Removal of existing heaters and pipework
- New electric boiler Installation
- New hot water cylinder installation
- Existing pipework modifications
- New electrical Installation

Following onsite usage monitoring, TJ Hall presented DHL with the hot water usage report and a schedule of new equipment. DHL signed off the new installation proposal which included alternative temporary measures for the provision of hot water and all works were completed within an agreed 5-day programme.
