CUSTOMER TESTIMONIAL

Warren Cobb, Director of Construction DHL

“I’ve been working with T J Hall since 2004 and they never fail to deliver. This was a particularly challenging project and they were a key factor in ensuring the project was delivered to all time, cost and quality parameters”

KEY CHALLENGES

This was a very challenging programme with the design constantly evolving as work progressed. Yet because of our close working relationship with the client and designers, late changes were incorporated with minimal impact on the project. Commitment to working all necessary hours ensured all works were handed over snag free to meet customer requirements. Again TJ Hall were able to work within the rigorous security controls required with the site being classified as airside.
