

Case Study

G4S Group for Secure Government Agency Site

Contract Value: £3m

T J Hall were proud to be asked by G4S to be part of a Secure Government Agency project in the South West of the UK. The project provided many challenges that T J Hall were happy to take on and overcome. One of the major issues was that this was a live site and the work of the agency had to continue around the clock for the forty weeks that we were on site.

Turnkey Works Included

- Diversion of Major Services
- Major CCTV Ductwork Alterations
- Major Data Cable Ductwork Alterations
- Major Civil and Groundwork
- Additional Lighting and Lighting Stands
- Amendments to Secure Fence Line
- Additional CCTV
- Construction of 'Bomb' Blast Gatehouse
- Installation of Vehicle Mitigation Bollards
- Extra Car Parking Areas
- Extensive Traffic Management

Working closely with the client, a range of traffic management systems were installed, which always allowed the staff to be able to access the site. Successfully working to bring the project in on time and on budget, in an environment with very demanding security procedures and protocols, T J Hall yet again demonstrated the ability to work flexibly and take on hugely complex projects.

Creating the **perfect**
working environment
